Subject: 2021 GDSN Certified Data Pool Audit Final Results

Dear GDSN Certified Data Pool,

On behalf of the GS1 GDSN Board Certification Committee, an annual audit was executed to verify that each GDSN Certified Data Pool is in compliance with the Global Registry Access and License Agreement and the GDSN Data Pool Certification Criteria policy. The intention of this letter is to officially close the 2021 audit by providing your formal audit results and document any required action steps as a result.

In reviewing the results of the 2021 Audit, it has been determined that **Datapool @GP is compliant** with all Certification Criteria.

Please note the following:

- Annual audit results are based on self-declaration of the Data Pool
- The annual audit does not encompass any possible formal complaints against individual Data Pool

To successfully pass the audit and retain the GS1 GDSN Certification seal, a data pool must comply with the following as outlined in the GDSN Certification Criteria policy:

- Technical Performance Criteria
- Implementation Performance Criteria
- Operational Performance Criteria
- Security Performance Criteria
- Legal Obligations Criteria

The GS1 GDSN Board and Certification Committee would like to thank you for your continued support of the network and for continuing to uphold the vision and philosophy of GDSN and GS1 System Standards.

Sincerely,

A handwritten signature in blue ink that reads "Rd Barbuat".

Renaud de Barbuat
President, GS1 GDSN Board
